Güber (Version 1.0)

3/20/17
William Scotten
Brian Truong
Desmond Chan
Hikaru Kasai
Jay Patel

README

Güber provides the latest in taxi routing technology. Güber provides a server and client environment that supports multiple clients and instantaneous responses. Güber can also be configured to different cities and locations.

To run the server application, type `./GuberServer <port number>`
To run the client application, type `./GuberClient <host name> <port number>`

Use the same port number for both applications, and make sure the value is greater than 2000.

Troubleshooting and Bug reports
Here at Stack Labs, we are dedicated to the best in quality and service. Contact us at StackLabs@gmail.com for customer support and to report any potentially game-breaking bugs. Please allow 24 to 48 hours for a response.

Contact
